Bank Aplication

React.js   React-Redux

Hooks   react-bootstrap

This is a Bank Aplication project. Here you can see your accounts, detail information about your accout, send money to somebody and so on. This projects based on react-redux-hooks (useSelector, useDispatch, useState, useEffect and so on) .

Weather App

React.js   React-Redux

This Weather App based on react.js and react-redux. In this project I have used real API, so this app works in real time. To manage state I used Redux. For requests I used Redux Thunks, axios.

Social Network

React.js   React-Redux

This is a social network based on react.js and react-redux. This is a global project in which I have used many concepts, methods, libraries, modern approaches (hooks for example), side effects (interaction with the server for example). To manage state I use Redux.
